Alimentation SMPS - Melcher

Je constate que le firme Melcher a été phagocytée dans un grand groupe :

Melcher - Power-One Company Overview

Melcher Inc. was a leading supplier of high-reliability DC/DC power products throughout Europe. Melcher Inc. was acquired by Power-One, Inc. in August, 1998. Power-One was founded in 1973 to manufacture AC/DC products. Power-One's products refine electricity into the many voltage and reliability levels needed to power high availability infrastructure systems. Power-One has evolved over 30 years into an industry leader, competitive on a world-class level.

On pourrait donc trouver en occasion des modules sous différentes marques et fabriqués en Slovaquie. Eh oui tout se perd mon monsieur.. Et le meilleure façon de se perdre c'est de ne pas savoir ou l'on va.
